

Information Session: Software Storage Management

On Tuesday, June 9th, BCS-IBM Bermuda Agency will be hosting a **Software Storage Management Information Session** featuring demonstrations and presentations on the IBM Tivoli Storage Manager (TSM) solution. This storage management software from Tivoli protects you from the risks of data loss and helps you reduce complexity, manage costs and address compliance with data retention and availability requirements.

Why You Should Attend

In this Information Session you will discover how you can:

- Improve business continuity by shortening backup and recovery times and maximizing application availability with advanced data recovery management technologies
- Employ data de-duplication and a hierarchy of storage to increase efficiencies and conserve resources
- Enhance data security with innovative access and encryption features
- Help adapt to changes within the IT infrastructure to minimize service disruptions and speed restorations and backups

For many years, IBM has provided the Bermuda market with reliable and effective backup and restore solutions, and through our experience as one of the top providers in Bermuda we understand your top priorities when it comes to data backup management:

1. Fast and Reliable Technical Support - language barriers from other vendors prevent effective fixes of your issues in a timely manner
2. Effective Backup and Restores - 'Incremental Forever Backups' provide more efficient and effective backup and restores
3. Tape Management and Reclamation - reduce the hardware and management cost of backups
4. Cost effective solutions comparable to other vendors

Event Details

Date: Tuesday, June 9, 2009

Time: 2:00pm to 4:00pm
